O R D E R

The VC & MD, TSCSCL through the reference 7th cited, has submitted the following requirement for procurement of State pool rice and Sannabiyyam during KMS 2019-20.

(A) State Pool rice:

- The monthly requirement of rice under TPDS including NFSA Schemes of GoI as per existing cards (NFSA + State cards) is about 1.75 LMTs against which the average monthly distribution of rice under TPDS is 1.52 lakh MTs.
- The Govt. of India is allocating 1.08 LMTs of rice per month under NFSA, requirement of which is to be met from CMR accepted by the State Government. As the Govt. of India is considering distribution under NFSA as per Annavitran Portal, the average distribution under NFSA up to August-2019 for the current financial year is ranging between 0.97 LMTs and 0.98 LMTs.
- Therefore, the distribution of rice under TPDS beyond GoI schemes/allocation per month is about 0.54 LMTs i.e., 6.50 LMTs per annum, the requirement of which is to be met by State Government through procurement of additional raw rice under State pool.

(B) Sannabiyyam:

- The monthly allocation of rice by Govt. of India under MDMS and Hostels Scheme is about 15000 MTs (3445 MTs MDMS + 11775 MTs WIs & Hostels). Based on the average off-take, the requirement of Sannabiyyam under these Schemes is about 12,000 MTs per month. Therefore, 1.50 LMTs of Sannabiyyam is needed per annum to meet the annual requirement of sannabiyyam under the above Schemes.

2. The VC & Managing Director, TSCSCL, Hyderabad has also informed that, after taking in to consideration of annual requirement, there would be necessary to procure 6.00 LMTs State Pool Rice and 1.50 LMTs of Sannabiyyam (Steamed – 37500 MTs and Raw -112500 MTs) during KMS 2019-20 and requested to issue necessary orders for taking further necessary action in this regard.

**NOTES APPLICABLE TO THE SPECIFICATION OF GRADE 'A' AND
COMMON VARIETIES OF RICE**

1. The definition of the above refractions and method of analysis are to be followed as given in Bureau of Indian Standard "Method of analysis for Foodgrains" No's IS: 4333 (Part-I) 1996 and IS: 4333 (Part-II) 2002 "Terminology for Foodgrains" IS: 2813-1995 as amended from time to time.

Dehusked grains are rice kernels whole or broken which have more than $\frac{1}{4}$ of the surface area of the kernel covered with the bran and determined as follows:-

ANALYSIS PROCEDURE: Take 5 grams of rice (sound head rice and brokens) in a petri dish (80X70mm). Dip the grains in about 20 ml. of Methylene Blue solution (0.05% by weight in distilled water) and allow to stand for about one minute. Decant the Methylene Blue solution. Give a swirl wash with about 20 ml of dilute hydrochloric acid (5% solution by volume in distilled water). Give a swirl wash with water and pour about 20 ml. of Metanil Yellow solution (0.05% by weight in distilled water) on the blue stained grains and allow to stand for about one minute. Decant the effluent and wash with fresh water twice. Keep the stained grains under fresh water and count the dehusked grains. Count the total number of grains in 5 grams of sample under analysis. Three brokens are counted as one whole grain.

CALCULATIONS:

$$\text{Percentage of Dehusked grains} = \frac{N \times 100}{W}$$

Where N = Number of dehusked grains in 5 grams of sample

W = Total grains in 5 grams of sample

2. The Method of sampling is to be followed as given in Bureau of Indian Standard "Method of sampling of Cereals and Pulses" No IS: 14818-2000 as amended from time to time.
3. Brokens less than 1/8th of the size of full kernels will be treated as organic foreign matter. For determination of the size of the brokens average length of the principal class of rice should be taken into account.
4. Inorganic foreign matter shall not exceed 0.25% in any lot, if it is more, the stocks should be cleaned and brought within the limit. Kernels or pieces of kernels having mud sticking on surface of rice, shall be treated as Inorganic foreign matter.
5. In case of rice prepared by pressure parboiling technique, it will be ensured that correct process of parboiling is adopted i.e. pressure applied, the time for which pressure is applied, proper gelatinisation, aeration and drying before milling are adequate so that the colour and cooking time of parboiled rice are good and free from encrustation of the grains.

Annexure III
